EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with James Kelley on 8 November 2007.

The application has been amended as follows:

Claim 115, line 2, replace

“analysis is T-RELP (terminal restriction fragment length polymorphism)” with
-- analysis is T-RFLP (terminal restriction fragment length polymorphism) --

Claim 144, line 2, replace

“polymorphous analysis is T-RELP” with
-- polymorphous analysis is T-RFLP--

Reasons for Allowance

Claims 110, 115, 117, 119, 121, 123-125, 128, 130, 132, 133, 135, and 143-149 are allowed. Claims 1-109, 111-114, 116, 118, 120, 122, 126, 127, 129, 131, 134, and 136-142 have been cancelled.

The following is an examiner's statement of reasons for allowance: The prior art does not teach or fairly suggest a method of determining the initial amounts of individual species of a target gene comprising the steps of instant independent claims 110 and 143. Specifically, the prior art does not teach the polymorphous composition ratio, multiplying the initial amount of the target gene by the polymorphous composition ratio, and determining the initial amounts of individual species wherein the oligonucleotide forms no stem-loop structure between bases at positions where the oligonucleotide is labeled with the fluorescent dye and quencher substance, as in instant claim 110. In addition, the prior art fails to teach or fairly suggest the method of claim 143, wherein, specifically, composition ratios are used to determine the initial amounts of individual species of the target, wherein obtained gene fragments are thermally modified into single strands and wherein the fluorescent-quenching probe is labeled at a phosphate group or a 5'-OH group and has a base sequence that when hybridized to the probe at least one guanine base exists in the target gene which is one to three bases apart from the end.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Inquiries

Papers related to this application may be submitted to Technical Center 1600 by facsimile transmission. Papers should be faxed to Technical Center 1600 via the PTO Fax Center. The faxing of such papers must conform with the notices published in the Official Gazette, 1096 OG 30 (November 15, 1988), 1156 OG 61 (November 16, 1993), and 1157 OG 94 (December 28, 1993) (See 37 CFR § 1.6(d)). Patent applicants with problems or questions regarding electronic images that can be viewed in the Patent Application Information Retrieval system (PAIR) can now contact the USPTO's Patent Electronic Business Center (Patent EBC) for assistance. Representatives are available to answer your questions daily from 6 am to midnight (EST). The toll free number is (866) 217-9197. When calling please have your application serial or patent number, the type of document you are having an image problem with, the number of pages and the specific nature of the problem. The Patent Electronic Business Center will notify applicants of the resolution of the problem within 5-7 business days. Applicants can also check PAIR to confirm that the problem has been corrected. The USPTO's Patent Electronic Business Center is a complete service center supporting all patent business on the Internet. The USPTO's PAIR system provides Internet-based access to patent application status and history information. It also enables applicants to view the scanned images of their own application file folder(s) as well as general patent information available to the public.
